## INTRO TO MW CTR-IN

### Mountain West IDEa Clinical and Translational Research Infrastructure Network

Mountain West (MW) Clinical Translational Research Infrastructure Network (CTR-IN) is a NIH funded Institutional Development Award (IDeA) program that began on September 15, 2013 with an initial cycle that runs through June 30, 2018.

## OUR MISSION

### Sustainable Impactful Independent Extramurally Supported Research

To accelerate the development of capacity, and the necessary institutional culture change.

To increase the quantity, quality, and number of successful NIH grant applications in clinical and translational research.

To accelerate scientific discovery to improve health in the 7 Mountain West IDEa states regions.

## OUR PARTNERS

The CTR program encourages partnerships between institutions with limited expertise and infrastructure for clinical and translational research and established clinical and translational centers, including institutions with Clinical and Translational Science Awards (CTSAs) and Research Centers in Minority Institutions (RCMIs). We are fortunate to have both a CTSA and an

RCMI partner graciously lending their expertise. We join 4 other CTRs across the nation, those at the West Virginia University and Louisiana State University were funded in the fall of 2012, while ours, the University of Oklahoma and the University of Delaware were funded in the fall of 2013.

Alaska

Hawaii

Idaho

Montana

Nevada

New Mexico

Wyoming

The Mountain West CTR-IN is hosted at the University of Nevada, Las Vegas. It was developed as an activity of the Mountain West Research Consortium (MWRC) and represents a partnership among the following 13 universities across our 7 states:

- University of Alaska – Anchorage
- University of Alaska – Fairbanks
- University of Hawaii – Manoa (RCMI partner)
- Boise State University
- Idaho State University
- University of Idaho
- Montana State University
- University of Montana
- University of Nevada, Las Vegas (host)
- University of Nevada Reno Including the University of Nevada School of Medicine
- University of Nevada Reno Including the University of Nevada School of Medicine
- New Mexico State University
- University of New Mexico (CTSA partner)

Mountain West CTR-IN  
Funded by a grant from the National Institute of General Medical Sciences of the National Institutes of Health: # 5U54GM104944

# MW CTR-IN Funding Opportunities

MW CTR-IN offers a variety of funding support and opportunities including a Pilot Grant RFA and a Visiting Scholars RFA.

PILOT GRANTS

VISITING SCHOLARS

## Pilot Grants

The objective of the CTR-IN Pilot Grant Program is to build clinical and translational research capacity and extramural funding success among investigators at the Mountain West Research Consortium institutions. Pilot funding support can be transformative in the Mountain West by helping existing programs reach national competitiveness and providing opportunities for new and established investigators to engage in translational, human or population research. In addition to providing funding for clinical and translational research, the Pilot Grant Program facilitates cross-disciplinary and cross-institutional collaborations and provides linkages to the study design, biostatistics, education, mentoring and career development assistance offered through the other components of the CTR-IN.

[PILOT GRANT INFO](#)

[PILOT GRANT RFA SITE](#)

## Visiting Scholars

The Mountain West CTR-IN seeks to fund Visiting Scholars to provide additional opportunities for training in clinical and translational research. Visiting Scholar awards will be targeted to New Investigators or Early-Stage Investigators, as [defined by the NIH](#). Support of these investigators is central to the mission of the CTR-IN, and the provision of an immersion experience with mentoring by experienced clinical and translational investigators is concordant with the goal of the CTR-IN to increase NIH-funded clinical translational research in the region.

## MW CTR-IN Biostatistics Support

Biostatisticians are available at each university and should be the key contact for investigators at each university. One of the MW CTR-IN Cores is Design, Epidemiology and Biostatistics (CRDEB) that provides comprehensive support for study design, biostatistics, and basic data management from a centralized, coordinated resource that includes faculty from MWRC institutions. A team of biostatisticians collaborate closely with MWRC investigators in developing innovative research designs and biostatistical methodologies.
